

S-SOY BLEND W/S; 50/50% Soy/Cotton; The softest thin batting there is, and a joy to hand quilt. Great for miniatures, as well as the 'old' look of a lightweight project. Soy Protein Fiber is eco-friendly and truly friendly to our skin. Soy contributes comfort, luster, drape and an easy hand to quilt making. Shrinkage 2/3% Stitches up to 8-10" apart. DOES NOT RETAIN A CREASE.

B-BAMBOO BLEND W/S; 50/50% Bamboo/Cotton Bamboo adds softness to this cotton blend and is eco-friendly in every way, from the region that it originates from, to the manufacturing process. Bamboo breathes and is cool by nature. Bamboo owns a unique anti-bacterial ability. Shrinkage 2/3% Stitches up to 8-10" apart. Easy to stitch by hand and machine.

C-WHITE COTTON; 100% Bleached Cotton for white and light colored quilts. Will not alter the tones of a very light project. 100% cotton is sustainable and friendly to the environment and always has been. Centuries of quilt making have proven the strength and durability of this natural fiber. All cottons will shrink 3/5%. Stitches up to 4" apart. Needle punched.

N-NATURAL COTTON; 100% Natural Cotton. The only difference in our Natural Cotton and White Cotton is the color. Needle punching adds no chemicals. No chemicals nor scrim support is used, making this a soft, natural and easy to needle batting that is super for garments as well as sleeping quilts. Soft battings make soft quilts. Needle punched.

W-WOOL; 100% Super washed wool blended with binder fibers to thermal bond this soft and natural fiber. This wool is the absolute ultimate in hand and machine quilting due to its airy loft that returns to original condition. Definition to the stitching is the quality highly sought by all quilt makers. The easiest to hand quilt. Shrinkage 0/3%. Stitch spacing up to 4".

A-NATURAL 80/20 BLEND; 80% Cotton & 20% Polyester needle punched and bonded for a substantial and durable combination of fibers offering the best of both fibers. Hand and machine quilters will enjoy this uniform and clean blend that makes a warm bed quilt and displays definition to their stitchery. Stitch distance 4". Shrinkage 3-5%. Great for wall quilts due to its loft and definition to the quilted stitch.

P-POLYESTER; 100% Siliconized Polyester. A very small denier polyester provides a uniquely soft loft and proper bonding offers uniformity. Pre-test very dark fabrics for bearding. Thermal bonding retards bearding and offers marvelous definition to stitchery and is extremely easy to hand quilt. Polyester traps body warmth and makes a warm bed quilt. Shrinkage 0-2% Stitch distance 4".

E-NATURAL BLEND W/S; 80/20% Cotton/Poly - needle punched to a very light weight support [scrim] binder for strength without stiffness. Shrinkage is 3/5% [gentle/harsh laundering conditions]. Stitch distance is 8-10" apart due to the support. Very clean cotton, natural color. Lightweight and soft! The loft has substance that will show definition to quilting stitches.

L-LIGHT BLEND W/S; 50/50% Bleached Cotton/Slick Polyester; Soft and natural blend of bleached cotton and slick polyester that is needle punched onto a very light weight support for strength. Created for quilts using LIGHT colors to preserve the tones. Easy to needle by hand and a delight to use by machines of all types. Shows marvelous definition to the stitches Shrinkage. 0-3%

F-NATURAL COTTON W/S; 100% Natural Cotton Needle punched to a very light weight support [scrim] for strength. Shrinkage is 3/5% [gentle/harsh washing conditions]. Stitch distance is 8-10" apart due to the binder. Very clean cotton, natural color. Lightweight and soft!

G-WHITE COTTON W/S; 100% Bleached Cotton Same details as White Cotton [C no support] but is needle punched to a very light-weight support/scrim for strength. Support needle punched to an all natural batting provides strength that allows for a stitching area as much 8-10" apart. White batting is used with very light fabrics.

D-DARK BLEND W/S; 70/30% Bleached [& Dyed] Cotton/Polyester Created for dark fabrics colors to enhance deeper tones. A super soft combination of bleached cotton that has been safely dyed black & soft polyester for loft. Needle punched on to a very light weight support/scrim which allows for incredible hand quilting as well as machine work. Shows incredible definition to the stitching. Minimal shrinkage.0-2%

R-FR RAYON W/S; 100% Rayon Non-combustible, non-toxic, will not melt nor drip in a fire and is cigarette resistant. Rayon is a natural fiber. Our process has created a soft and lofty batting that will make a superb baby quilt as well as any quilt used as bedding. Rayon provides warmth. Shrinkage 4/6% - Stitches up to 8-10" apart - Very light weight support. Pre-soaking is recommended.

H-FLAX LINEN BLEND W/S; 50/50% Linen/Cotton Linen is a plant fiber made of the flax plant and is one of the earliest fibers to be made into cloth and is the strongest vegetable fiber, with 2 to 3 times the strength of cotton. This thin batting is highly absorbent, has a natural luster and a crisp hand. Shrinkage 2/5% Stitches up to 8-10" apart. Needle punched to a very light weight support.

L-998 ULTRA THIN POLY; 100% Siliconized Polyester micro denier 2.1 oz polyester displaying a very low loft that provides a very soft, uniform and silky hand. Shrinkage 0/2%. Stitches up to 8-10" apart. Very light weight with a low loft of 1/8". Easy to needle. Excellent for garments and wall quilts as well as table runners and any quilt project needing a light inner lining providing thin body with very little loft
